Submitted,

SUB: Report on “CYBERSECURITY AND ETHICAL HACKING - WORKSHOP” – reg.

Hands-on workshop for 5days on Cyber security and Ethical Hacking was conducted from 19.12.2022 to 23.12.2022 with a time period of 10 am to 4 pm by Mr. Ajinkiya Lokahare, CTO, Ditto Security, Mumbai. The workshop was arranged for a total count of 90 students who belong to III year of CSE Department in CSE lab.

Dr. Smitha J A, Head of the Department CSE inaugurated the session by welcoming the gathering. The session was handed over to the resource person. The session was effective as it was regarding the cyber security introduction in the morning session. Since students have not studied the cyber security concepts in their curriculum, this morning session gave them an idea about cyber security and its attacks. Following which they had their hands-on session by installing KALI Linux software. The students had various sessions like Brainstorming, Quiz O Mania, Activity on Attacks and Firewall Hacking. The later days students worked with Crypt tools to make their security enhancement learning.

The session was very useful to students with respect to hacking and they gained knowledge about the working of crypt tools. Students made themselves to be involved in all activities. Finally, on the last day students are evaluated by having an assessment and those who cleared the assessment were given with workshop certificates.

Our students also conveyed that the program had given an ignite for skilling up with the required knowledge as cyber security plays a vital role in today's point. The vote of thanks to the resource person was given by Prof. Jenifer A, Assistant Professor, Department of CSE, Sri Sairam College of Engineering.
