**Sub: Report on Industrial Visit-Visveswaraya Industrial & Technical Museum - Reg.**

A batch of 103 students from 1<sup>st</sup> semester ECE and five staff coordinators Prof.Halesha Dr. Srilatha B, Prof.Aruna R, Dr. Hari Krishna and Mr. Manjunath Y had accompanied for the visit to **Visveswaraya Industrial & Technical Museum, Bangalore on 2<sup>nd</sup> March 2022.**The various Floors visited were **Engine Ignition, Electronics ,Electrical, Space, Power supply & Transmission System.**

On Wednesday by 9.30 am, we the staff & students started from college campus with the permission of our beloved principal Dr.B. Shadaksharappa & our management representative Dr.R. Arun Kumar & head of the department Dr.T.N. Prabakar by college bus. We reached at 11.00 am.

The students were received from the main entrance. Then divided into batches for the demonstration about the different technologies with the practical demo with the switches available there with each experiment like and how technologies are used. The students understood the basics of learning different subjects in Electronics and Communication Engineering.

The Museum has so many sub divisions like electronics, electrical, ignition, power generation and transmission. How the devices are connected in for communication. The space technology, the use of RADAR and sensors. Overall to understand in detail about the technology one day is not sufficient. By 2.00 pm all the staff and students had the lunch and started back to the college campus.

The industrial visit was highly worth for the students in terms of practical knowledge about the way of communication and transmission through antennas. Such visits are needed in future too to gain more practical knowledge & awareness about the technologies.

IV Coordinator

Head of the Department
