

YOU CAN'T REACH HOME

UNLESS **YOU** ARE CAUTIOUS ON ROAD

Road users in India are heterogeneous in nature, ranging from pedestrians, animal-driven carts, bi-cycles, rickshaws, handcarts and tractor trolleys, to various categories of two / three wheelers, motor cars, buses, trucks and multi-axle commercial vehicles.

More than 1,200,000 people are killed in road accidents worldwide, every year. Road accident is the pinnacle sole cause of death and disability for people aged between 4 & 50 years in India. Accidents and the fatalities on road are the result of inter-play of a number of factors.

INDISPENSABLE PRUDENCE

FOR SAFE DRIVING

Wearing seat belt keeps you secure in exact place.

Mobile phones kill more people than guns do; no conversation is worth our life.

Road crashes are manmade epidemic, can always be avoided

90 % of accidents can be avoided by following speed limits

Safe drive stays alive, fast drive last drive

You Booze, U cruise & you lose. Don't drink and drive

To avoid "hell-met" always wear helmet

Drive cautiously, follow traffic rules and save your life.

THE WORD **SAFETY** MAY STARTS WITH "**S**" IT BEGINS WITH "**U**"
