FOREWORD

The aim of higher Education in India is to provide access, equity, quality with accountability at affordable cost to all aspiring Citizens with utmost transparency so as to ensure sustainable economic development of the nation. It is achieved through creation, dissemination and application of knowledge. The All India Council for Technical Education (AICTE) has been in existence since November 1945 as a national level Apex Advisory Body and as a statutory body through an Act of Parliament in 1987 with its mission of developing and promoting quality Technical Education in the Country in a coordinated and integrated manner. The Council's constant endeavor is to encourage a meaningful association between the Technical Education system and research and development activities in a concerted effort aimed at nation-building.

Technical Education at all levels is witnessing a severe competition and only those Institutions who strive for excellence will survive. The Council believes in providing all kinds of support and encourage Institutions to think beyond the Curriculum while imparting training for the advancement of knowledge. The Council has put in place several initiatives to bring about changes in the Approval Process by introducing greater transparency and accountability through the e-governance. AICTE has been constantly endeavoring to simplify the procedures and bring in greater ease in the approval process through informal and formal interactions with all stakeholders. The role of AICTE, as a true facilitator of quality Technical Education is evident from the changes made in the Approval Process Handbook along with revised Gazette Policy, Regulation No. F.No: AB/AICTE/REG/2018 of AICTE dated 31st December, 2018. This is expected to create an academic ambience in the Technical Institutions for nurturing and supporting quality, so that Technical Education in India will be one of the best in the world. Supporting Institutions for Autonomy, Accreditation of Programmes, Ranking of Institutions, schemes such as, NDF, Margdarshan, Adjunct Faculty and Unnat Bharat Abhiyan, launching of Student Startup Policy 2016, Smart India Hackathon 2018, a MOOCs platform SWAYAM are a few of the important initiatives embarked upon by AICTE during the last year. Further, several new initiatives such as the revision of all Under Graduate and Post Graduate Curricula, teacher training Programmes for both new teachers and in service teachers, student Induction Programme, mandatory Internship for students, Examination reforms, support for innovation and entrepreneurship, Industry Interaction Cells, starting the work on a National Perspective Plan for Technical Education have been initiated. AICTE has signed several MoUs with both Government Departments and private Organizations, NGOs, startups for supporting students and Institutions in getting internship opportunities. The Introduction of National Academic Depository for storing all students' Educational Certificates, all fee collections and scholarship disbursements through cashless digital means are major changes initiated by the Government of India and implemented by AICTE.

This handbook is an attempt to provide comprehensive information on the fair and rational system of administration as well as other necessary information on the processes involved under the aegis of AICTE. The emphasis on e-governance to ensure transparency and accountability, and implementing a tech-savvy approach to enable faster processing and clearly defining the Infrastructural norms in Institutions are just a few pointers towards AICTE's efforts at fostering a Technical Education system which is on par with the best Institutions in the world.

Swami Vivekananda said "Education is the manifestation of the perfection already in man". In keeping with this objective, apart from regulatory role, AICTE shall continue to strive to be a true mentor, facilitator and enabler in bringing out the best in each Institution. We hope all the stakeholders of Technical Education shall also put in their best and make team India proud.

योगः कर्मसु कौशलम् (Excellence in action is yoga)

Anil Sahasrabudhe
Chairman, AICTE

1 Background and Statutory Provision under AICTE Act Regarding Planning, Promotion and Regulation of Technical Education

The beginning of formal Technical Education in India can be dated back to the mid-19th Century. The major Policy initiatives in the pre-independence period included the appointment of the Indian Universities Commission in 1902, issue of the Indian Education Policy resolution in 1904 and the Governor General's Policy statement of 1913 stressing the importance of Technical Education, the establishment of IISc in Bangalore, Institute for Sugar, Textile and Leather Technology in Kanpur, National Council of Education in Bengal and Industrial Schools in several provinces. Significant developments include:

- Constitution of the Technical Education Committee of the Central Advisory Board of Education (CABE) of 1943;
- Preparation of the Sergeant Report of 1944; and
- Formation of the All India Council for Technical Education (AICTE) in 1945 by the Government of India.

AICTE was set up in November 1945 based on the recommendations of CABE to stimulate, coordinate and control the provisions of Educational facilities and industrial development of the post war period. At that time, a mandate of AICTE basically covered only Programmes in Engineering and Technology.

The growth of industries in the Country, just after independence, also demanded the need for qualified professionals in other fields, such as Business Management, Architecture, Hotel Management, Pharmacy etc. Although the diverse elements of Management such as Commerce, Economics, Finance, Psychology and Industrial Sociology were being taught for a long time, the need for Management Education in a formal way was felt in India only in the fifties. The Government of India decided in 1954 to set up a Board of Management Studies under AICTE to formulate standards and promote Management Education. Other major initiatives taken in Management Education include: setting up of the Administrative Staff College of India at Hyderabad in the late fifties, National Productivity Council and Indian Institute of Management in the early sixties. Architecture was covered under the Architects Act, 1972. Subsequently, for better coordination of the Professional Courses, Architecture Education was also placed under the purview of AICTE.

Hotel Management Education had a modest beginning with short Programmes in Nutrition and Food Science, which started in the late fifties. The National Council of Hotel Management and Catering Technology were set up in 1982, to which all the Institutions of Hotel Management run by the Government are affiliated.

Education in other professional fields such as, Pharmacy, Applied Arts, Crafts and Design has also undergone similar developments during the post-independence period. Programmes for Technical Education, during the first three Five Year Plans, were devoted to the expansion of Technical Education to meet the growing demand for technical personnel at Diploma, Degree and Post Graduate Levels. From the fourth Five Year Plan onwards, the emphasis was shifted to the improvement of quality and standards of Technical Education. This was done through implementation of the Quality Improvement Programme consisting of three major components that provided for M.E./ M.Tech. and Ph.D. Programmes, Establishment of Curriculum Design and Development Cells, and Short Term Training Programmes.

Meanwhile, expansion of Institutions and Intake remained at a low level in the Government, Private-aided and University sectors. The Policy Shift during the eighties towards involvement of Private and Voluntary Organizations in the setting up of the Technical and Management Institutions on self-financing basis ushered in an era of unprecedented expansion of the Technical Education System, a trend which has continued during successive Five Year Plans.

It was in this context that AICTE was given statutory powers by AICTE Act of Parliament in 1987, with a view to ensure the proper planning and coordinated development of the Technical Education System throughout the Country. Technical Education in this context includes fields of Engineering and Technology, Pharmacy, Architecture, Planning, Applied Arts, Crafts and Design, Hotel Management and Catering Technology and Management.

2 Growth of Technical Education

The growth of Technical Education in the Country before independence was very slow. The number of Engineering Colleges and Polytechnics (including Pharmacy and Architecture Institutions) in 1947 was 44 and 43 with an Intake capacity of 3200 and 3400 respectively.

Due to the efforts and initiatives taken during successive Five Year Plans and particularly due to Policy changes in the eighties to allow participation of Private and Voluntary Organizations in the setting up of Technical Institutions on self-financing basis, the growth of Technical Education has been phenomenal.

Technical Education at all levels in the Country is witnessing a consistent growth pattern marked by the setting up of new Technical Institutions and the improvement of the existing ones in tune with the quality assurance norms set by the regulating and accreditation agencies.

15.0 Grievance Redressal Mechanism

In order to ensure transparency by Technical Institutions imparting Technical Education, in admission and with Paramount Objectives of preventing unfair practices and to provide a mechanism to students for Redressal of their Grievances, AICTE has notified Regulations for establishment of mechanism for Grievance Redressal Committee and OMBUDSMAN for all AICTE approved Technical Institutions vide No. 37-3/ Legal/ 2012 dated 25.05.2012. Non-Compliance of the above Regulations shall call for punitive action.

Guidelines for establishment of Grievance Redressal Mechanism

The Ministry of Human Resource Development (MHRD), Government of India has emphasized that there is a need for a structured mechanism for online registration as well as disposing of the Grievances of students/ Faculty/ stakeholders in every Institution approved by AICTE.

In view of the above, all the Institutions are requested to urgently put in place an online mechanism, if not presently existing, for registering and disposing of Grievances. Once this mechanism is established, the following outcomes are desired to be fulfilled:

- i. Each AICTE approved Technical Institution should be able to receive and dispose of the Grievances **online**.
- ii. Each of these Institutions should have a notice board/flex board fixed near the Office of its Head, indicating the details of online Grievance Redressal Mechanism i.e. URL of the online Grievance Redressal Portal, Names, contact nos. and e-mail IDs of members of the Grievance Committee, to ensure publicity/awareness of the establishment of Grievance Redress Mechanism/ Students Grievances Portal. This would help speedy Redressal of the Grievances and obviate/reduce the urge to lodge the Grievance on pg.portal of DARPG. The Grievance Committee may include one female member, one member from SC/ ST/ Minority/ OBC and two other members.
- iii. An **online monthly Status Report** regarding the number of Grievances received, disposed off and pending as on the last day of the previous month should be informed to AICTE.
- iv. Non-Registration of Grievances on the Web Site of the Institution resulting in more number of Grievances being registered on the pg.portal of the Central Government which would be an indication that the Grievance Redress Mechanism of the respective Institution/Organisation is not working properly to the satisfaction of the petitioners.
- v. The performance of the Grievance Redressal Mechanism at the point of arising of the Grievance, i.e. the Institution may be taken into account by the Accreditation Agencies.
- vi. The Council shall take into account the performance of the Grievance Redress Mechanism at the point of origin of the Grievance, i.e. Institution, at the time of renewal of their permission/approval every year.

All the Institutions are requested to take necessary steps to implement the above.

1.0 Recommended Short and Medium Term Perspectives for Engineering Education in India by the Committee to provide National Perspective Plan

Technology and Globalization have turned Countries into knowledge-driven economies. They are radically accelerating the pace of change in the world and raising the long-term risks. Success in knowledge-driven and innovation-driven world order depends largely on the capabilities of the people, and higher education, especially Engineering education, is the key to building those requisite capabilities. India has done phenomenally well in creating large infrastructure across the Country to disseminate Engineering education to lakhs of aspirants in every State year after year. However, to be able to cater to the next-generation of Engineering skill requirements, we need to facilitate quality and accredited Technical Education at scale. In our efforts to support the reforms in Engineering education, we have studied the current state of Engineering education and present, in this report, our short and medium term perspectives and recommendations.

Recommendations:

1. Current (2017-18) capacity utilization in Under Graduate and Post Graduate Level is as low as 49.8% (Capacity Vs Enrolment). Creating any further capacity is a big drain on investments since, at the very basic level, it involves the creation of physical infrastructure like Buildings and Laboratory infrastructure. **We recommend that we do not create any new capacity starting from the Academic Year 2020.** The creation of new capacity can be reviewed every two years after that.
2. While we take such a serious decision, we also recognize that there could be some applications in the pipeline for additional/ new capacity applied in the last one or two years. These may be pending for want of some minor clearances. So, applications made in the current year and the past two years may be considered for starting Institutions, if the infrastructure is already in place.
3. We recommend that AICTE should take capacity utilization as a key consideration while granting additional capacities in different States.
4. Traditional Engineering disciplines such as Mechanical, Electrical, Civil and Electronics Engineering capacity utilization around 40% as opposed to Computer Science and Engineering, Aerospace Engineering, Mechatronics, being in the high 60%. This is clear pointer that the demand lies in emerging technologies as opposed to traditional Engineering. We recommend that no additional seats are approved in traditional Engineering areas, but Institutions need to be encouraged to convert current capacity in traditional disciplines to emerging new technologies.
5. The poor employability of Engineering graduates is reflecting poorly on the Faculty-shortage and quality, and pedagogy. It may be very important to take immediate steps to improve the quality of our teachers.
 - a. Competencies of the Faculty need to be developed, especially in the areas of new age technologies and research through rigorous Faculty development programs. Training of existing teachers at Teachers Training Institutes, using quality improvement programs (QIP) and using IIT/ NIT Faculty and Infrastructure are some of the immediate interventions we recommend.
 - b. To bring about the desired change in the pedagogy in the immediate term, we recommend focused Industry visits for Faculty for hands-on exposure to the latest technologies. Industry associations could be leveraged in facilitating this.
 - c. To improve pedagogy, we recommend Engineering Faculty to mandatorily have Certification/ Diploma/ Degree in education.
6. Also, we may have to seek more technology interventions such as MOOCs to circumvent some of the constraints with Faculty shortage and the quality of pedagogy. Students should be given more flexibility to use MOOCs in their core and optional curricula. Universities and Autonomous Institutions should be mandated to use MOOCs in the short term.

7. The low enrolment, lower placements, and low employability are causes for concern. Employment generation is very critical to a Nation's economic development. While we are making certain recommendations on the role that academic Institutes can play in improving the quality of education and indirectly contribute to the employment generation, all other stakeholders including Government and Industry should also start putting in place corrective measures to improve the employment generation.
8. As research becomes democratized, funds would need to be spent most optimally. Institutions need to build project management capabilities around research to ensure quick turnarounds, reduce cost and schedule overruns, and better collaborations across Industry and Academia.
9. Academic Institutions have to continuously monitor the future skill requirements and make suitable changes to content and pedagogy so that the graduating students have the right capabilities for the job-in-demand. Hence, an Institutional mechanism for periodic Industry feedback on the technology upgradation and its impact on job roles needs to be put in place.
10. There is evidence to point out that the current Industry-Academia interaction requires improvement. We recommend the following interventions:
 - a. Analytical tools should be used to understand the impact of various teaching methods and identify the best methods of executing coursework and apprenticeship - tightly integrate apprenticeship with pedagogy.
 - b. Apprenticeship should be made mandatory on Industry (in some ways it exists but needs rigorous implementation) and also progressively mandatory on educational Institutions (starting with 25% moving to 100% in five years).
 - c. Two industry representatives to be part of the Advisory Board of each Institution.
 - d. Deepening of Industry-Academia partnerships in applied research needs to be encouraged.
 - e. Establish 20 National Knowledge Functional Hubs (NKFH) as a pilot in AICTE approved Institutions to create an ecosystem of sustained Industry-Academia engagement.
 - f. We recommend that AICTE takes the local Industry ecosystem requirements (For instance, Aerospace and IT Engineering in Bangalore vicinity, Automotive in Chennai and Pune) into consideration while creating new capacities or increasing the existing capacities to deepen domain knowledge and to meet the Industry requirements.
 - g. Simultaneously, we recommend that AICTE balances this step with the National and Global needs by introducing courses in new and disrupting technologies which are fungible across the Country.
11. We have evidence to show that innovation, incubation and start-up eco system is lacking in educational Institutions. As has been rightly recognized by GoI, start-ups are a key driver for employment generation and wealth creation. Every education Institution should be mandated for the following:
 - a. Entrepreneurship should be a minor elective for Under Graduates.
 - b. Tinkering Laboratories similar to Atal Innovation Laboratories to be setup in every educational Institution.
 - c. To promote start-ups, educational Institutions need to setup incubation centres, mentoring clubs, and accelerator programs.
12. Proxy indicators such as venture capital investments and Engineering R&D investments by large Companies for forecasting future technology shows a clear trend towards software and internet Industries, healthcare services, and medical devices and semiconductor Industry. They also clearly

indicate that **Artificial Intelligence (AI), Internet of Things (IoT), Embedded SW, Internet SW, Mobility, Analytics, and Cloud** are growing at a rapid pace as compared to traditional technologies. The results of the NASSCOM - BCG study and FICCI-NASSCOM-EY study also concur with this analysis.

- a. Across all Engineering disciplines, we recommend, that courses in these emerging technologies are made part of the curricula and made mandatory for Computer Science, Electrical, and Electronics Engineering.
 - b. Specifically, we recommend introducing Under Graduate Engineering programs exclusively focused in AI, IoT, Blockchain, Robotics, Quantum Computing, Data Sciences, Cyber Security, 3D Printing and Design, AR/VR.
 - c. Also, we recommend that, we put greater focus on multi-disciplinary Engineering courses, especially in Computational Biology, Biotechnology, Biomedical, Mechatronics, Space, Aerospace, Agriculture, and Environmental Engineering, by reducing the seats in conventional disciplines and converting some of the existing seats into these areas.
13. Research on future trends in education indicates student-centric learning needs to be given precedence.
- a. We recommend students should be encouraged on design thinking and practical approaches to learning.
 - b. Students should also be made aware of real life socio-economic problems for them to solve using technology learnings.
 - c. Technology should be used for individual learning paths for each student.
 - d. MHRD/ AICTE should make investments in innovation in education and incubate education start-ups.
 - e. Open book examinations should be introduced wherever applicable to move students to higher order cognitive skills.
14. Finally, developing a Perspective Plan for Engineering education should be an ongoing exercise. In the backdrop of rapidly-changing technology environment, Engineering education needs continuous monitoring. We recommend that one of the Industry bodies or a smaller group of Industry bodies with the help of Consultants who have a focus on education be tasked with this periodic planning exercise once every two years.
