

Club Activity in college

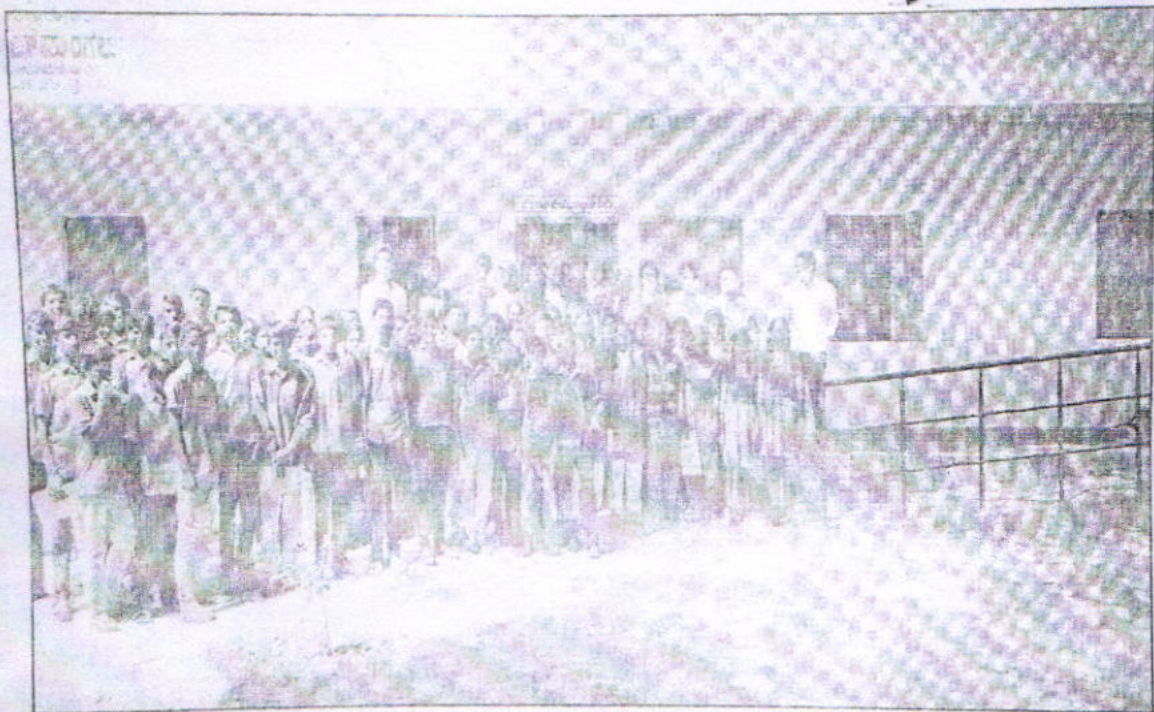

BY-SSCE MATH CLUB

On

16/11/18 & 17/11/18

Second day of program 17/11/18: On the second day of our program we visited Submangala government high school where we were given an opportunity to spread awareness about maths. We gave them a glance about a life without maths. We had given them basic information about maths as well as the awareness about maths not only in their daily life but also all around the world. We explained importance of maths in pharmaceutical, medical, civil so on. Students there were also so supportive our main aim was to spread awareness about maths. Those students were also interactive with our students.
