Report on Industrial Visit Report

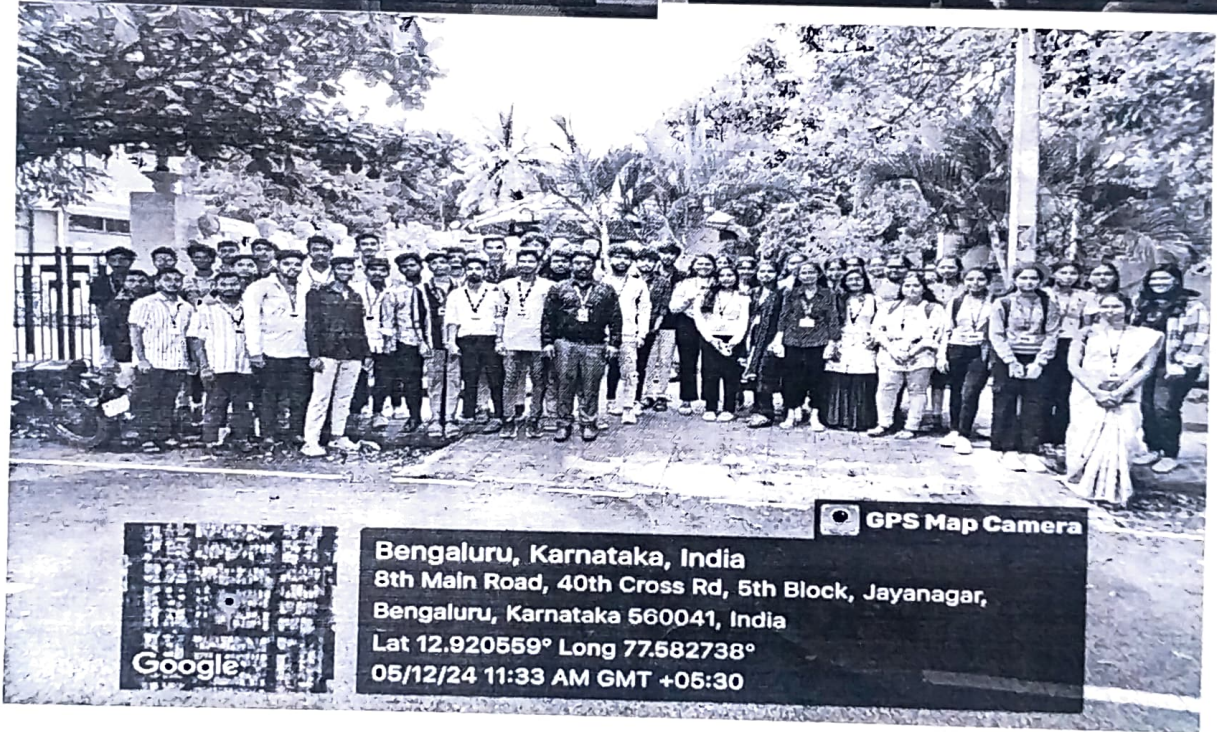

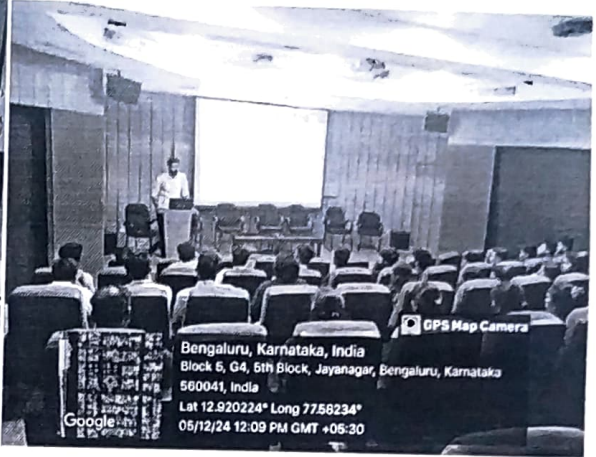

The Electronics and Communication Engineering students (**II Year, B Section**) visited the **Sir M. Visvesvaraya Rain Water Harvesting Theme Park**, Jayanagar, Bengaluru, on **5th December 2024**. The visit, led by faculty members **Dr. Martin Joel Rathnam** and **Dr. Anitha V**, included 65 students. The objective was to expose students to rainwater harvesting techniques and sustainable water management practices.

Students were welcomed by **Mr. Sunil B, Project Associate Engineer**, and **Mr. Nikhilesh B V**, who conducted a detailed presentation on water conservation, highlighting key methods such as rooftop harvesting, groundwater recharge, and filtration systems. The session also emphasized the critical role of rainwater harvesting in addressing water scarcity in urban and rural areas. This was followed by an interactive explanation of practical setups, maintenance, and benefits of rainwater harvesting systems.

The students then toured the park, observing models and live demonstrations, which offered practical insights into theoretical concepts. Q&A session concluded the visit, with Mr. Sunil and Mr. Nikhilesh addressing queries on challenges and the role of technology in improving water management.

The visit heightened awareness about water scarcity, provided practical knowledge on rainwater harvesting systems, and reinforced the importance of sustainability. We express our gratitude to **COO Dr. Arun Kumar, Principal, Dr. Shadaksharappa, HoD, Dr. A. Poonguzhali**, and Industrial Visit Coordinator **Dr. S. Jayakumar** for their support in making this a successful and enriching experience.
