

Report on 12th GKDC Organized by ISNEE Motorsports

The 12th Go-Kart Design Challenge (GKDC) was organized by ISNEE Motorsports and held at Kari Motor Speedway, Coimbatore, from 19th February 2025 to 23rd February 2025. This five-day event witnessed participation from numerous teams across the country, competing in various categories to showcase their engineering skills and innovation in go-kart design and performance.

We, Team Shikra from Sri Sairam College of Engineering, participated in the competition under the CV (Combustion Vehicle) Category and achieved remarkable results:

- Secured All India Rank 11 (AIR-11) in the CV Category.
- Won First Place in the DisAsm Event (Disassembly and Assembly of Go-Kart) with an impressive time of 11 minutes 33 seconds and 49 milliseconds (633.49 seconds).
- Became the first team to clear the On-Site Technical Inspection in respect to both CV and EV Categories.

These accomplishments reflect our team's dedication, technical expertise, and rigorous preparation. The event provided an excellent platform to enhance our engineering knowledge, teamwork, and problem-solving abilities. Our success in the DisAsm Event and early clearance of technical inspections highlight our efficiency, precision, and adherence to technical regulations.

We extend our gratitude to our Principal and Management, Sri Sairam College of Engineering, and our sponsors for their unwavering support. The 12th GKDC was an invaluable learning experience, and we look forward to achieving even greater milestones in future motorsport challenges.

Submitted to the Principal
 for further needful.
