

Report on ANNUAL MAMMAL CENSUS 2025 - 21st Feb 2025 to 23rd Feb 2025

The Kenneth Anderson club had organized ANNUAL MAMMAL CENSUS 2025 supported by nature and Wildlife club, Sri Sairam College Of Engineering in observance of SDG goals Life on Land(15), Life below Water(14) and Climate Action (13).The 40 members team ventured into forest on the belt of river cauvery in Tamilnadu forest range on 21st alongwith an expert team from the forest department

The survey involved the participants to engage in transect counts inside the forest area. Each transect extended upto 10km in varying terrain conditions.The volunteers were advised to be absolutely certain about their physical fitness and ability to follow the instructions of forest staff at all times. The basic knowledge on mammals and data collection were the qualifying points to participate in the event.

Night safari deep inside the forest was opening a new vision on night life in forest. Experts used tools like camera , binocular and direct observations to count different mammal species and understand their numbers and behavior. Deep inside the forest of **Rasimanal** , a reserve forest , the team could locate animal tracks, the sittings and collected the animal dung, pugmark and sittings of the animal and had a note of it. The team could locate elephants, Derr, Arter, Cranes, Wild boars, Crocodiles , Cheeta and rare birds. The team collected the census for compilation and returned . The experience the nature enthusiasts carried was lifetime memory and could witness the effect of global warming on wildlife and nature deep inside the forests. The annual mammal census by KANS NGO and N&W Club members ,SSCE in Hosur Forest helped track and study the wildlife in the area
