Report on "Building the Nation-An Engineer's path to Civil Services"

The **Higher Education Cell** of the institution organized an offline expert session for the III & IV year students on "Building the Nation – An Engineer's Path to Civil Services" with the objective of creating awareness about the UPSC examination, its preparation strategies, and the diverse career opportunities it offers. The session was coordinated by **Dr. Suvodip Mukherjee, Higher Education Cell Coordinator** and Assistant Professor, Department of Science and Humanities, who welcomed the resource persons and students. Held on **25th August 2025**, the program aimed to motivate engineering students to look beyond technical careers and explore the scope of contributing to nation-building through civil services. The guests were felicitated by **Prof. (Dr.) Harikrishna S, HOD, S&H**.

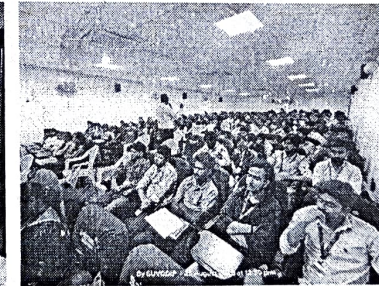

The resource persons for the session were **Mr. Nagaraj M. Nimbalkar**, Mentor and Motivational Speaker, and **Mr. Deepak Kumar**, Sales & Marketing Leader, both representing **BMS Academy**. With their rich experience in training, mentoring, and higher education, they delivered an engaging and insightful session. The speakers began with an introduction to the **UPSC Civil Services Examination** followed by **CAT and GRE** exams, elaborating on its purpose, structure, marking scheme, syllabus updates, and the wide range of disciplines covered. They emphasized that the exam serves as a gateway to numerous prestigious Class A and Class B government services such as **IAS, IPS, IFS, IRS, and many others**, which not only command respect but also provide a platform to contribute meaningfully to society. The session also highlighted the importance of holistic growth, urging students to combine their technical expertise with leadership and administrative skills to become well-rounded professionals. Students were motivated to adopt qualities such as discipline, perseverance, resilience, and a growth mindset, which are vital not just for cracking competitive exams but also for long-term success in any career. The motivational aspect was particularly impactful, as the speakers shared personal experiences, success stories, and practical tips on managing stress, building consistency, and staying focused during UPSC preparation.

The interactive Q&A session that followed saw enthusiastic student participation. Questions revolved around effective preparation strategies, balancing engineering academics with

UPSC coaching, choosing the right optional subject, and understanding the career paths of IAS, IPS, and IFS officers. The clear and thoughtful responses provided by the speakers helped students gain confidence and reinforced the idea that civil services are not just a career choice, but a path towards nation-building and personal growth.

The expert session on “Building the Nation – An Engineer’s Path to Civil Services” proved to be highly informative and inspiring. It successfully motivated students to explore opportunities in civil services, instilled awareness of UPSC career prospects, and encouraged them to prepare effectively for the future.

The Higher Education Cell extends its sincere gratitude to Mr. Nagaraj M. Nimbalkar and Mr. Deepak Kumar for their valuable contributions, and to the faculty and management for their continuous support. The program has undoubtedly left a lasting impact, encouraging students to aim higher and aspire for meaningful careers that contribute to the progress of the nation.
